

vLight Smart LED Bulbs & Gateway Bridge

1, Introduction

It is your personal wireless lighting. It enables you to create and control light using your smart phone or tablet. Bringing endless possibilities to help you get creative and help you personalize your lighting to suit your and your family's lifestyle. It can help you relax or concentrate, change the atmosphere of a room, help keep your house safe when you're out, and even remind you of that magical moment on vacation.

The starter pack includes three bulbs that simply screw into your existing lamps, and a gateway bridge that you plug into your home Wi-Fi router. Simply download the APP to start experiencing light in a completely new way. The included wireless bridge is required for controlling the lighting system -- up to 50 bulbs. You can add more bulbs to your system by purchasing single bulb package

From the app, you can remotely control your home lighting for added security, personalize your lighting experience with custom settings, or program timers to help manage daily schedules -- all through the convenience of your smart phone or tablet.
